MarkeDroid introduces new Onboarding flow

MarkeDroid introduced its new onboarding flow. The onboarding consists of 4 steps. Let's take a look at them below:

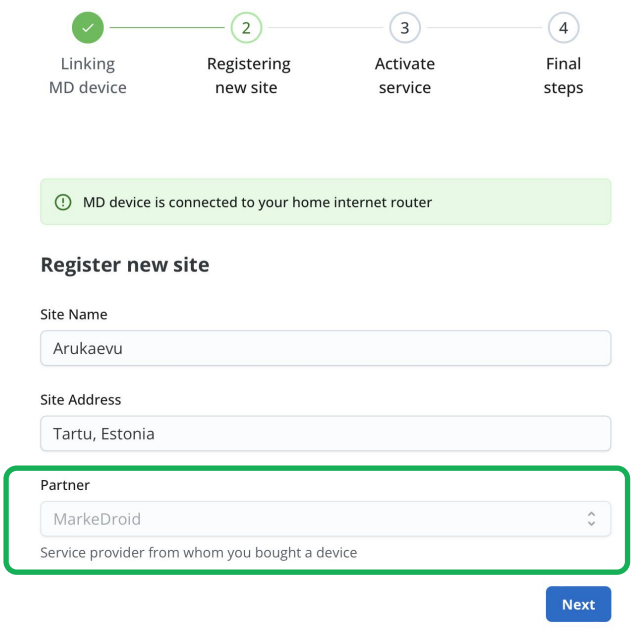

1. First step: Linking MD Device

- Make sure you follow steps 1 2 3 for the onboarding to be successful.
- Button "Find markedroid device" will open up a separate linking web window – makes sure pop-ups are allowed
- Once the device it's found, the site will automatically go to step 2.

2. Second step: Registering new site

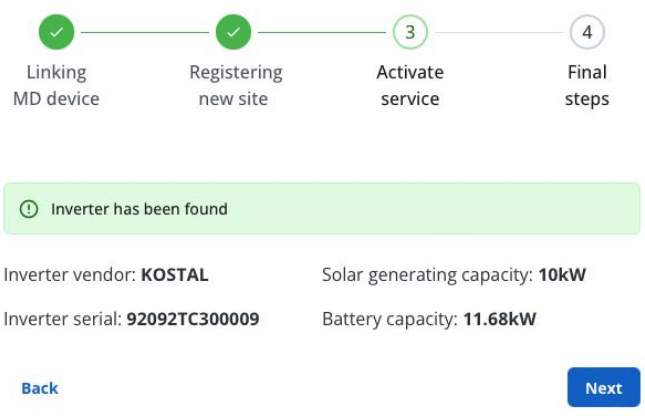

- Give your brand-new site a name and fill in the address. In countries, where there is multiple market price areas, you will be asked select correct one also.
- Partner – that is your Site installation and support partner, most cases it is the company who installed your Solar system. Partner may be already predefined and not changeable in case your Partner has already declared this MarkeDroid device to belong to their customer. **Once partner information is saved, it can not be changed by customer anymore.**
- Click "Next".

3. Third step: Activate service

At this step you are displayed the information that we have gathered about yur installation automatically.

- Just click "Next".

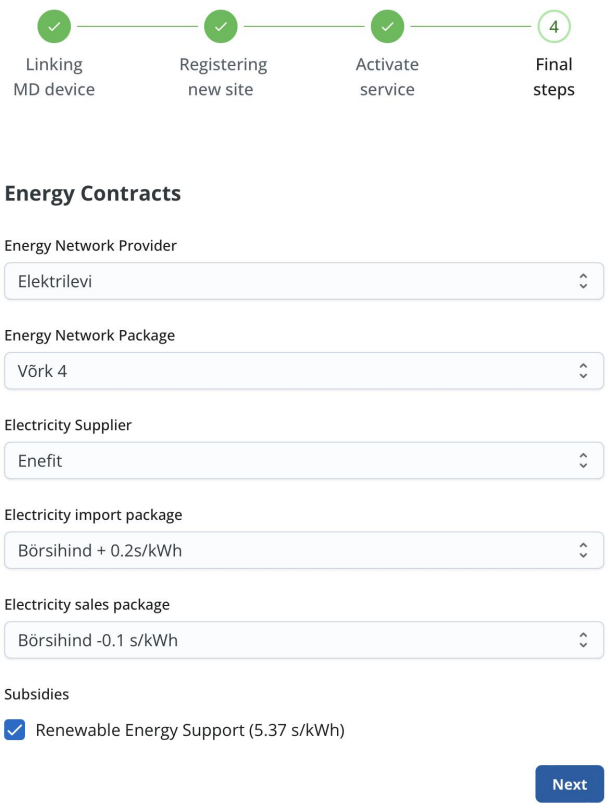

4. Fourth step: Final steps

At this step there is some final settings to be adjusted in order to makes sure your site is controlled based on as correct information as possible and energy contracts information is very key in that

You can edit Energy Contracts by clicking and choosing from the dropdown menus.

Click "Next"

Upon successful completion of the 4 steps, you'll be taken to the main dashboard where you can view MarkeDroid Live.
